Surfing is one of the most popular extreme sports in the world. On TV, we often see surfers ride the waves in the sea or the ocean by standing or lying on a surfboard.

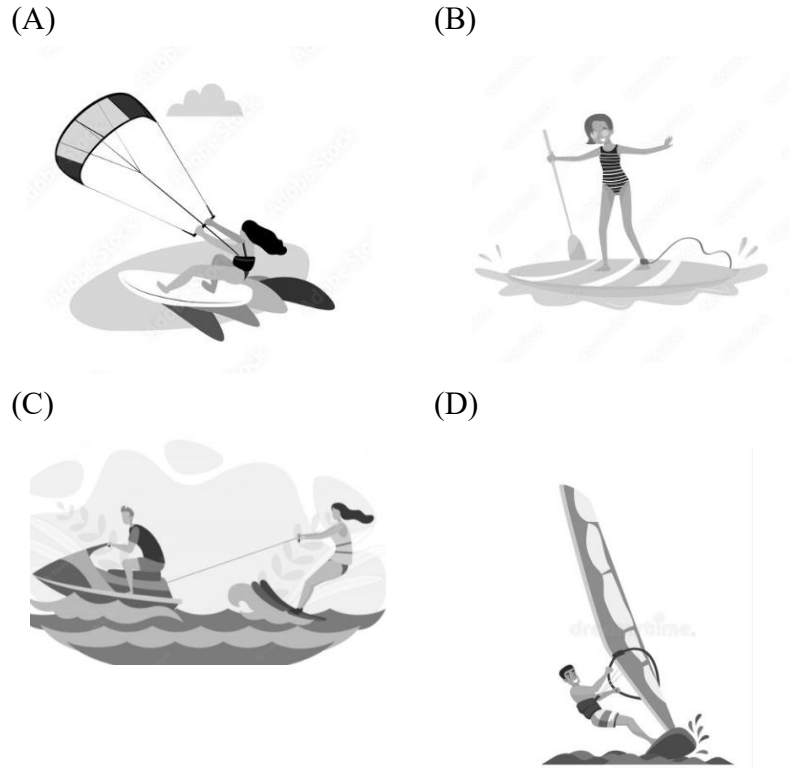

If you want to learn how to surf, start with windsurfing. It is easier than wave surfing. Windsurfing is an extreme sport. It allows you to move on the water using the wind. At the same time, a surfboard and a sail can help you move. In windsurfing, a sail is used instead of the waves to move on the water. It takes a lot of exercises. People need to learn how to stand firm on the board and control the sail.

However, in wave surfing, all you have is just a surfboard. Unlike windsurfing, wave surfing is more affected by the waves. You may want to take some lessons before you can enjoy surfing. By taking these, you can learn to control the wind, the waves, and how to climb on top of the board and stay in balance. You will also learn safety information and find the best surfboard type for yourself.
