Food Delivery Is Not an Easy Job

There are more and more food deliveries now. We can see a lot of food delivery people on the road. It is convenient

for us. When we don't want to go out, we can use an App to order a meal. However, it is not an easy job. Delivery people have to deliver the food on time, or customers may get mad. If that happens, they will leave bad comments on the App. Then the boss would deduct the delivery people's pay.

Three months ago, I became one of them. One day, it was raining heavily. People didn't want to go out, so we got a lot of orders. It takes us more time to deliver the food on a rainy day. Some people get angry because we are late. So, this makes us late for the next delivery. It is not our fault!

We don't want to be late, so we ride fast. Some of us even have car accidents. No one wants to make people angry and get bad comments. If people can be friendlier to us, maybe some accidents will not happen. However, many of them don't understand it is not an easy job. They only care about their food.
